DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

Use semicolons at the end of statements. This makes the code explicitly clear where statements end.
Use 2 spaces for indentation. Consistent indentation helps make code visually easy to parse.
Name booleans like isOpen rather than open. Prefixing booleans with "is" makes it clear it's a boolean rather than another data type.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

Use array destructuring. Destructuring syntax is new to me, so remembering when and how to use it correctly will take some time.
Use object destructuring for multiple return values rather than arrays. Remembering when to use object vs array destructuring is confusing at first.
Do not use brackets around single-statement arrow function bodies. The brackets actually can make things clearer in many cases.
